Qualitative explanation of changes in dairy methane emissions and progress towards goals from previous year

✓ Explanation of any business shifts or external factors that may have resulted in changes in emissions unrelated to the company's methane abatement strategies
(e.g., mergers and acquisitions, divestments, unrelated changes to dairy procurement and sales)

Update on status of implementing strategies and action items articulated in the DMAP
(e.g., new strategies or technologies added to the DMAP, strategies or technologies that were not successful or practical to apply; changes to key details such as expected timeline and/or plans for scaling interventions, implementation regions, KPIs, investments and capital expenditure alignment)
